

Competition with Office station, the *key benefits from EasyServer 2000/XP* as following:

1. Save the initial H/W and S/W setup cost.
2. Easy to manager the PC data: the Administration from main console can control whether they want to change Windows' settings, update applications or virus scanners, backup files, or assist users.
3. Data Manager : Protecting and limiting information to those with the necessary permissions for per workstations.
4. Save power consumption : Only one main PC service many person meet the Green PC Concept.
5. Save the PC space : For example, the inquiry system, the library system, KIOSK or POS.. etc.
6. Save the maintained and upgrade cost in the future.
7. For some small office, the EasyServer don't need the server. No network administrator is needed as everything to network the workstations together is done automatically.
8. Include EasyConsole for local and remote control.
